

Non-GAAP Financial Measures

The schedule below presents net debt, net leverage and adjusted EBITDA, which represent non-GAAP financial measures. We provide reconciliations of these measures to the most directly comparable measures calculated in accordance with United States generally accepted accounting principles ("GAAP"). We believe that net debt and net leverage are important measures of our overall liquidity position and are calculated by removing cash and cash equivalents from our reported total debt and reporting net debt as a ratio of our reported adjusted EBITDA for the trailing twelve months ended June 30, 2026 and March 31, 2026. We believe that presenting adjusted EBITDA improves the comparability of our operating results from period to period by removing the impact of our capital structure (interest and financing expenses), asset base (depreciation and amortization), tax impacts and other adjustments as set out in the table that management has determined are not reflective of core operating activities and thereby assist investors with assessing trends in our underlying businesses. Other companies may calculate net leverage, net debt and adjusted EBITDA differently and, therefore, our measures may not be comparable to similarly titled measures of other companies. Net debt, net leverage and adjusted EBITDA should only be used as supplemental measures of our operating performance.

¹ Relates to environmental and product liability claims involving a former subsidiary of Con-way, which was sold prior to XPO's acquisition of Con-way in 2015, as described in Note 17 to the Company's 2025 Annual Report on Form 10-K.

² Reflects the settlement of claims against certain truck manufacturers related to purchases by our European Transportation segment covering periods prior to 2015.

Non-GAAP Financial Measures

The schedule below presents free cash flow, which represents a non-GAAP financial measure. We provide a reconciliation of this measure to the most directly comparable measure calculated in accordance with United States generally accepted accounting principles ("GAAP"). We believe that free cash flow is an important measure of our ability to repay maturing debt or fund other uses of capital that we believe will enhance stockholder value. We calculate free cash flow as net cash provided by operating activities from continuing operations less net cash used in investing activities. Other companies may calculate free cash flow differently and, therefore, our measure may not be comparable to similarly titled measures of other companies. Free cash flow should only be used as a supplemental measure of our operating performance.
