

GXO

GAME-CHANGING OPPORTUNITIES

Investor Day | July 13, 2021

Disclaimer

Additional Information

References herein to "GXO" refer to GXO Logistics, Inc., a wholly owned subsidiary of XPO Logistics, Inc. ("XPO"). For additional information with respect to GXO and the proposed spin-off, please refer to the Form 10 Registration Statement, as it may be further amended, as filed by GXO with the U.S. Securities and Exchange Commission (the "Form 10"). The spin-off is subject to various conditions, and there can be no assurance that the spin-off will occur or, if it does occur, of its terms or timing. The financial information included in this presentation may not necessarily reflect GXO's financial position, results of operations and cash flows in the future or what GXO's financial position, results of operations and cash flows would have been had GXO been an independent, publicly traded company during the periods presented. This presentation shall not constitute an offer of any securities for sale, nor shall there be any offer, sale or distribution of securities in any jurisdiction in which such offer, sale or distribution would be unlawful prior to appropriate registration or qualification under the securities law of such jurisdiction.

Non-GAAP Financial Measures

Some of the information included in this presentation is derived in part from XPO's and GXO's consolidated financial information but is not presented in XPO's and GXO's financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Certain of these data are considered "non-GAAP financial measures" under Securities and Exchange Commission ("SEC") rules. As required by the SEC, reconciliations of the non-GAAP financial measures contained in this presentation to the most directly comparable measure under GAAP are provided and are set forth in the financial tables attached to the presentation.

This presentation contains the following non-GAAP financial measures: adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA"), pro forma adjusted EBITDA less net capex, adjusted earnings before interest, taxes and amortization ("EBITA"), adjusted earnings before interest, taxes, depreciation, amortization and rent expense ("adjusted EBITDAR"), return on invested capital ("ROIC") and organic revenue.

The above adjusted financial measures facilitate analysis of GXO's business operations because they exclude items that may not be reflective of, or are unrelated to, GXO's core operating performance, and may assist investors with comparisons to prior periods and assessing trends in GXO's underlying businesses. Other companies may calculate these non-GAAP financial measures differently, and therefore GXO's measures may not be comparable to similarly titled measures of other companies. These non-GAAP financial measures should only be used as supplemental measures of GXO's operating performance.

Adjusted EBITDA, pro forma adjusted EBITDA less net capex and adjusted EBITA include adjustments for transaction and integration, as well as restructuring costs and other adjustments as set forth in the tables included in the accompanying presentation. Transaction and integration adjustments are generally incremental costs that result from an actual or planned acquisition, divestiture or spin-off and may include transaction costs, consulting fees, retention awards, and internal salaries and wages (to the extent the individuals are assigned full-time to integration and transformation activities) and certain costs related to integrating and converging IT systems. Restructuring costs primarily relate to severance costs associated with business optimization initiatives. Management uses these non-GAAP financial measures in making financial, operating and planning decisions and evaluating GXO's ongoing performance.

Adjusted EBITDAR excludes rent expense from adjusted EBITDA and is useful to management and investors in evaluating GXO's performance because adjusted EBITDAR considers the performance of GXO's operations, excluding decisions made with respect to capital investment, financing and other non-recurring charges. Adjusted EBITDAR is also a measure commonly used by management, research analysts and investors to value companies in the logistics industry. Since adjusted EBITDAR excludes interest expense and rent expense, it allows management, research analysts and investors to compare the value of different companies without regard to differences in capital structures and leasing arrangements.

We calculate Return on Invested Capital (ROIC) as net operating profit after tax divided by average invested capital. We believe ROIC provides investors with an important perspective on how effectively GXO deploys capital and use this metric internally as a high-level target to assess overall performance throughout the business cycle. We believe that presenting organic revenue improves the comparability of our operating results from period to period by excluding the impact of foreign currency exchange rate fluctuations. We believe comparability is improved because these items are not reflective of our normalized operating activities.

With respect to GXO's full year 2021 and full year 2022 financial targets for adjusted EBITDA, pro forma adjusted EBITDA less net capex, adjusted EBITDAR, ROIC and organic revenue a reconciliation of these non-GAAP measures to the corresponding GAAP measures is not available without unreasonable effort due to the variability and complexity of the reconciling items described above that GXO excludes from these non-GAAP target measures. The variability of these items may have a significant impact on GXO's future GAAP financial results and, as a result, GXO is unable to prepare the forward-looking statement of income and statement of cash flows prepared in accordance with GAAP that would be required to produce such a reconciliation.

Forward-looking Statements

This presentation includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. In some cases, forward-looking statements can be identified by the use of forward-looking terms such as "anticipate," "estimate," "believe," "continue," "could," "intend," "may," "plan," "potential," "predict," "should," "will," "expect," "objective," "projection," "forecast," "goal," "guidance," "outlook," "effort," "target," "trajectory" or the negative of these terms or other comparable terms. However, the absence of these words does not mean that the statements are not forward-looking. These forward-looking statements are based on certain assumptions and analyses made by the company in light of its experience and its perception of historical trends, current conditions and expected future developments, as well as other factors it believes are appropriate in the circumstances.

These forward-looking statements are subject to known and unknown risks, uncertainties and assumptions that may cause actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Factors (including risks, uncertainties and assumptions) that might cause or contribute to a material difference include, but are not limited to: the severity, magnitude, duration and aftereffects of the COVID-19 pandemic and government responses to the COVID-19 pandemic; public health crises (including COVID-19); economic conditions generally; competition and pricing pressures; our ability to align our investments in capital assets, including equipment, service centers and warehouses, to our customers' demands; our ability to successfully integrate and realize anticipated synergies, cost savings and profit improvement opportunities with respect to acquired companies; our ability to develop and implement suitable information technology systems and prevent failures in or breaches of such systems; our ability to raise debt and equity capital; litigation; labor matters, including our ability to manage our temporary workers, and risks associated with labor disputes at our customers and efforts by labor organizations to organize our employees; risks associated with defined benefit plans for our current and former employees; fluctuations in currency exchange rates; fluctuations in and floating interest rates; issues related to our intellectual property rights; governmental regulation, including trade compliance laws, as well as changes in international trade policies and tax regimes; governmental or political actions, including the United Kingdom's exit from the European Union; natural disasters, terrorist attacks or similar incidents; political, economic, and regulatory risks relating to GXO's global operations, including compliance with U.S. and foreign trade and tax laws, sanctions, embargoes and other regulations; a material disruption of GXO's operations; the inability to achieve the level of revenue growth, cash generation, cost savings, improvement in profitability and margins, fiscal discipline, or strengthening of competitiveness and operations anticipated or targeted; the impact of potential cyber-attacks and information technology or data security breaches; the inability to implement technology initiatives successfully; the expected benefits and timing of the separation, and uncertainties regarding the planned separation, including the risk that conditions to the separation will not be satisfied and that it will not be completed pursuant to the targeted timing, asset perimeters, and other anticipated terms, if at all, and that the separation will not produce the desired benefits; a determination by the IRS that the distribution or certain related transactions should be treated as taxable transactions; the possibility that any consents or approvals required in connection with the separation will not be received or obtained within the expected time frame, on the expected terms or at all; expected financing transactions undertaken in connection with the separation and risks associated with additional indebtedness; the risk that dis-synergy costs, costs of restructuring transactions and other costs incurred in connection with the separation will exceed our estimates; and the impact of the separation on our businesses, our operations, our relationships with customers, suppliers, employees and other business counterparties, and the risk that the businesses will not be separated successfully or that such separation may be more difficult, time-consuming or costly than expected, which could result in additional demands on our resources, systems, procedures and controls, disruption of our ongoing business, and diversion of management's attention from other business concerns.

There can be no assurance that the separation, distribution or any other transaction described above will in fact be consummated in the manner described or at all. The above list of factors is not exhaustive or necessarily in order of importance. All forward-looking statements set forth in this presentation are qualified by these cautionary statements and there can be no assurance that the actual results or developments anticipated by us will be realized or, even if substantially realized, that they will have the expected consequences to or effects on us or our business or operations. Forward-looking statements set forth in this presentation speak only as of the date hereof, and we do not undertake any obligation to update forward-looking statements to reflect subsequent events or circumstances, changes in expectations or the occurrence of unanticipated events, except to the extent required by law.

GXO has the expertise to run the industry's most complex supply chains

CUSTOMER PROBLEM

“We need a comprehensive e-commerce supply chain solution”

“We need a single provider to manage our multinational supply chain”

“Our warehouse rents are too high”

GXO SOLUTION

Full-service offerings for entire e-commerce supply chain

Unified offering across global footprint

Strong real estate negotiating power as a top five global industrial tenant

GXO's ability to replicate outcomes across markets is a key differentiator

Customer case study – Walt Disney Parks and Resorts

The Disney MagicBand is an all-in-one, personalized wristband technology that gives a guest access to the Park, unlocks the Disney hotel room and is used to buy food and merchandise

CUSTOMER NEED

- In 2013, Disney sought a partner to collaborate in creating a supply chain for the new MagicBand product
- Disney required a customized logistics process for engraving and fulfillment that would ensure accuracy and delight their guests

GXO SOLUTION

- GXO developed a custom software-hardware solution, working with Disney, the MagicBand manufacturer and laser manufacturer
- GXO had previously invested in RFID, the technology used to read the MagicBand
- GXO's packaging engineers helped create a solution that satisfies production and shipping objectives, while providing guests with an attractive keepsake at the lowest possible cost

KEY RESULTS

- Rigorous controls built into GXO's solution ensure that the right name is engraved on each band prior to shipping
- Engineered packaging enhances the out-of-box experience for recipients in keeping with the Disney brand, without adding unnecessary cost

SUPERIOR VALUE

- GXO has helped transform how guests enjoy Disney Parks and resorts through a personalized experience

Tenure

- ✓ Personalized fulfillment: 8 years

GXO's capabilities cover the full spectrum of warehousing needs

CUSTOMER PROBLEM

"1 in 3 pairs of shoes we sell are being returned and it's causing significant disruption"

"We're sending customers the wrong products at a high rate"

"Labor availability has become less predictable during Covid"

GXO SOLUTION

Reverse logistics

**Advanced automation
and robotics**

**GXO Smart™
labor management tools**

Digital capabilities create value for the company and its customers

Customer case study – Nike

Nike is one of the world's most recognizable brands for athletic footwear, apparel, equipment and accessories

CUSTOMER NEED

- In 2017, Nike sought a logistics partner to manage product returns
- An increase in returns was adversely impacting Nike's bottom line

GXO SOLUTION

- GXO facilitated the set-up of over 1 million sq. ft. of reverse logistics space and accelerated the processing of inbound returns
- Deployed advanced planning to predict and prioritize high-value products in the reverse logistics process, reducing unnecessary inspections and the remerchandising of low-value products

KEY RESULTS

- Increased margin through improved velocity, advanced planning and analytics at a state-of-the-art facility, with engaged employees
- Eliminated backlog of more than 1,000 trailers, with remaining trailers processing packages within 48 hours
- Continue to provide support for 4,000,000 SKUs

SUPERIOR VALUE

- GXO dramatically reduced overall cycle time for Nike returns by integrating cutting-edge technology and reverse practices to achieve hyper-fast velocity

Tenure

- ✓ Reverse logistics: 4 years

Customer case study – Nike Rebound: Hyper-fast returns

GXO builds long-term partnerships with customers

CUSTOMER PROBLEM

“We need a trusted 3PL partner without channel conflict”

“We’re selling a high-profile new product and need to ensure a smooth rollout”

“We need to reduce the carbon footprint in our supply chain”

GXO SOLUTION

Largest global pure-play contract logistics provider

Long-tenured track record of superior execution

Expertise building environmentally friendly warehouses

Customers trust GXO with their most important asset – their reputation

Continuous improvement positions GXO as a trusted partner

Focus on continuous improvement (“CI”) drives best-in-class solutions and outcomes

- Identifies best CI tools available and shares universal best practices across footprint
- Identifies best vertical-specific practices, clearly differentiating GXO to customers and market
- Annual efficiency gains of 1% to 2% of sales, realized through CI initiatives

CONTINUOUS IMPROVEMENT LEVERS

CONTINUOUS IMPROVEMENT EFFICIENCY GAINS AS % OF REVENUE

GXO Direct: an innovative, shared-space distribution solution for customers

National distribution solution that gives customers fluid fulfillment with more flexibility than traditional distribution models, and at lower cost

ADVANTAGES FOR CUSTOMERS

- Maintain independent brand identity and value chain
- Access to logistics scale, expertise and technology without adding high-fixed-cost distribution centers
- Predictive analytics help plan inventory flows
- Reposition inventory within one and two-day ground delivery range of ~99% of the US population – increasing customer revenue growth by ~20% on average
- Service agility enhances brands
- Unrivaled speed to market

ADVANTAGES FOR GXO

- Differentiates GXO from other logistics providers
- Shared warehouse model increases utilization of existing warehouses and other resources
 - Over 1.7 million square feet of warehouse space converted into GXO Direct across 20 locations
- Enables commercial relationships with emerging super-growth firms that are too small to support a dedicated logistics facility

GXO DIRECT INTEGRATES THIRD PARTY E-COMMERCE PLATFORMS AND OMNICHANNEL RETAILERS

**>\$100 million of 2021E GXO Direct revenue,
with 30% YoY growth in 2021E**

Committed to achieving bold environmental targets

conversion rate by 2025*

GXO is focused on attaining its own ESG targets and helping customers attain their targets

Customer case study – Kering Group, the carbon negative warehouse

Kering is a global luxury group with an ensemble of renowned labels in fashion, leather goods, jewelry and watches

CUSTOMER NEED

- Kering sought an experienced contract logistics provider to help ship its luxury goods under various brands on a global scale
- The solution must include value-added services, including drop shipments and reverse logistics

GXO SOLUTION

- GXO's comprehensive solution includes multi-shuttle technology, line-hanging solutions, conveyors, mobile racking and shelving, and packing stations supported by automation
- GXO began operating the first warehouse in 2020 and the second in 2021; the operations are designed to reduce environmental impact and are certified to ensure sustainability

KEY RESULTS

- GXO's sophisticated logistics solution has led to extremely short lead times for B2B fulfillment, comparable to the speed of e-commerce operations
- Shipments are customized based on final destination, close to the time of distribution

SUPERIOR VALUE

- A new, GXO-managed logistics complex of 150,000 sq. m. (~1,615,000 sq. ft.) is in the start-up phase in Trecate, Italy
- The Trecate plant will have one of Europe's largest rooftop solar systems, saving an estimated 7,500 tons CO2 a year
- The site will also be the first industrial complex in Italy to produce more energy than it consumes

Tenure

✓ 20 years

Dedicated to fostering a culture of safety, diversity, inclusion and development

Favorable mix of employees and agency labor

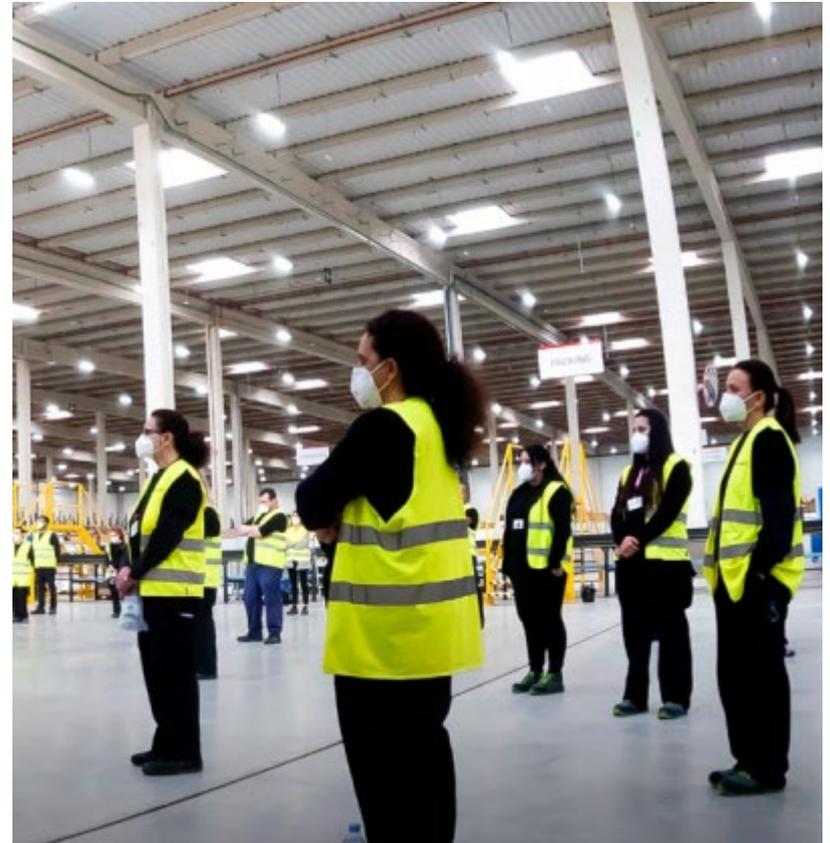

Best-in-class safety record

Diversity, inclusion and belonging steering committee

High level of employee engagement

Ongoing employee education to raise awareness about inclusion

Numerous community outreach programs

78% of 2020 US hires were diverse¹

Proprietary suite of intelligent productivity tools that optimize labor cost

- Machine learning drives productivity and operational effectiveness
- Optimizes labor force through peaks and troughs
- Site-specific modeling helps managers optimize decision-making
- Delivering tangible EBITDA improvement in 2021
- Smart™ currently deployed in ~60% of GXO sites

**“You have done an outstanding job...our productivity is through the roof.”
– Large European omnichannel retailer**

GXO Smart™ productivity management

Customer case study – Nestlé

“I'd like to offer a huge thank you to the many people at Nestlé and [GXO] who have worked so hard to bring our vision to life in this magnificent facility. Our digital distribution warehouse is an important step forward for our business and our customers.”

*Andrew Shaw
Supply Chain Director,
Nestlé UK and Ireland*

Tenure

- ✓ CPG logistics: 21 years
- ✓ Warehouse of the future: 1 year

Nestlé is the world's largest food and beverage company

CUSTOMER NEED

- Nestlé sought to build a state-of-the-art digital warehouse and innovation center in the UK for global product distribution

GXO SOLUTION

- GXO helped design and develop a ~638,000 sq. ft. facility that launched in 2020 with the ability to dispatch 1 million pallets per year – the highest throughput of any site in Nestlé's global logistics network

KEY RESULTS

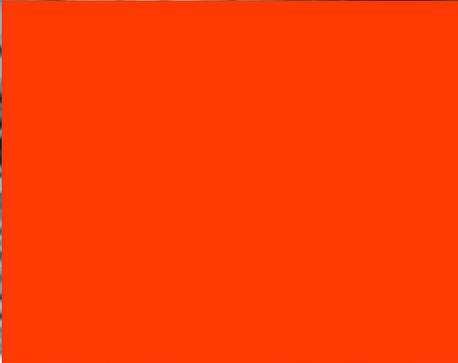

- The state-of-the-art digital warehouse of the future gives consumers faster, more efficient access to the iconic brands of the global food and beverage leader
- GXO and Nestlé are continuously improving responsiveness to channel customers by innovating fulfillment

SUPERIOR VALUE

- GXO strengthened its relationship with this world-class company through an innovative collaboration, and Nestlé continues to trust GXO with critical logistics needs

Customer case study – Nestlé digital warehouse of the future

- Aligned to ESG goals

2021E ROIC BRIDGE

~68% of GXO's 2021E capex relates to growth projects

2021E – 2022E organic revenue growth bridge

¹ Net of attrition

COMMENTARY

- **Organic revenue growth of 8% – 12%** for FY 2022E, above pro forma 2021E
- **Growth of 5% – 8%** from business wins
 - Record sales pipeline of ~\$2 billion and growing
 - High-quality opportunities converted to GXO wins
- **Growth of 3% – 4%** in revenue from existing customers
 - Long-cycle contracts
 - Increase in volume and prices

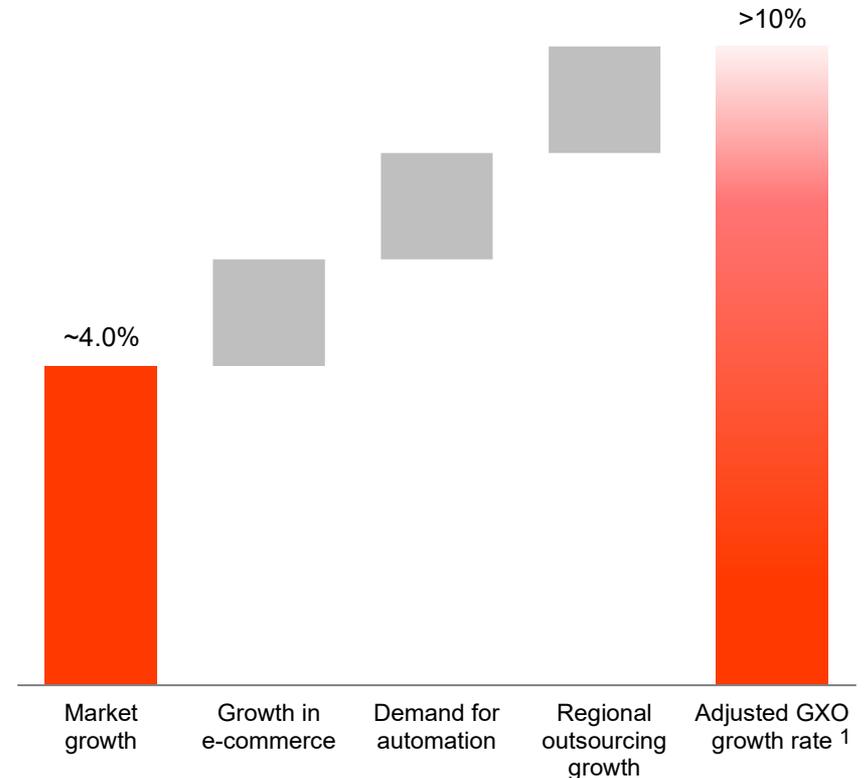

More than a decade of above-market growth remains

MEGATRENDS DRIVING TOPLINE GROWTH

- **E-commerce adoption** is accelerating coming out of COVID
 - ~11% e-commerce CAGR over next 5 years
- Customers are demanding increased **automation capabilities**
 - GXO is a leader in automation, where there is only currently ~5% penetration
- Increased complexity of supply chains will drive further trend towards **outsourcing**
 - Only 30% of contract logistics is currently outsourced

GXO'S TAILWINDS DRIVE ABOVE-MARKET GROWTH

2019–2023 industry CAGR

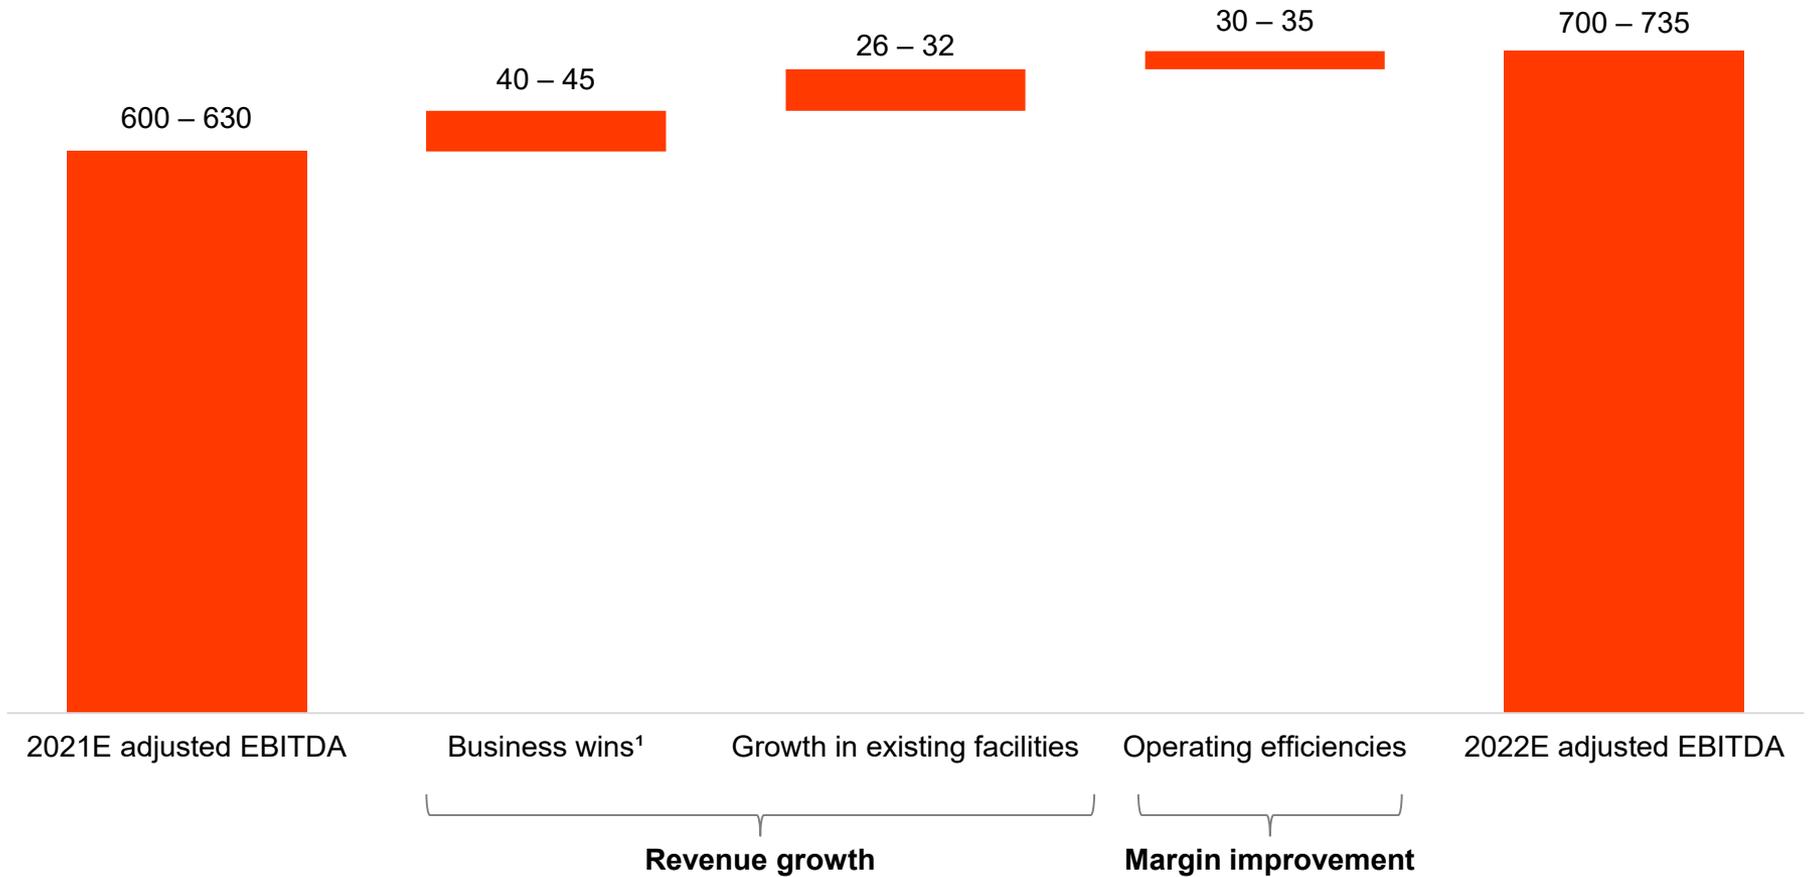

Secular megatrends will contribute to expected double-digit revenue growth

Drivers of long-term margin expansion

MARGIN EXPANSION LEVERS

- Drive further implementation of **GXO Smart™** and other proprietary software tools
 - GXO Smart™ implemented in ~60% of sites
- Grow base of **multinational**, high-margin contracts
- Expand **high-value-added services** (e.g. reverse logistics)
 - Reverse logistics only being used by ~30% of customers
- Mobilize **strategic account management** teams solely focused on landing the largest, most profitable accounts

E-COMMERCE DRIVES MARGIN EXPANSION

2020 adjusted EBITDA margin % before overhead allocation

Clearly defined initiatives underway for long-term margin expansion

Attractive capital structure to fuel future growth

EXPECTED CAPITAL STRUCTURE AT SPIN-OFF		COMMENTARY
Cash	\$100 million	<ul style="list-style-type: none"> ▪ Balance sheet right-sized for optimal cost of capital ▪ No maturities due before 2026 ▪ Expect minimum total liquidity of \$900 million <ul style="list-style-type: none"> – Minimum cash balance of \$100 million – Five-year revolving credit facility with \$800 million capacity ▪ Capabilities to invest in growth; investment-grade balance sheet ▪ Maintain leverage in target range of 1.0x – 1.5x ▪ Fully funded pension position; no cash contribution required ▪ Dividend policy to be determined by Board
Debt	\$800 million	
Average cost of debt	2.15%	
Net debt ¹ / 2021E pro forma adjusted EBITDA ²	1.1x	

¹ Calculated as total debt of \$800 million less cash and cash equivalents of \$100 million

² Reflects 2021 guidance; leverage is not inclusive of finance leases

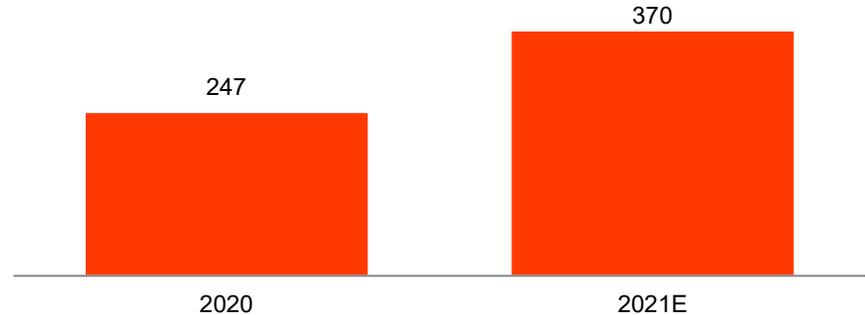

Refer to the “Non-GAAP Financial Measures” section on page 2 of this document

Significant runway for free cash flow generation

- Track record of significant cash generation whilst delivering best-in-class revenue growth
- Two-thirds of capex relates to growth
 - Maintenance capex on a favorable trend due to operational efficiencies
 - Maintenance capex currently ~1% of revenue

SIGNIFICANT LEVERS TO EXPAND EARNINGS ACROSS CYCLES

Pro forma adjusted EBITDA less net capex¹
\$ in millions

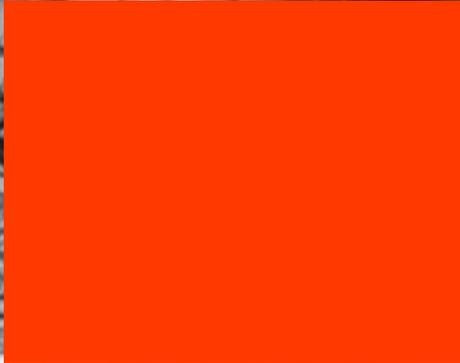

MODEST CAPEX REQUIREMENTS

Maintenance capex as % of revenue

Low maintenance capital requirements drive future free cash flow expansion
